

ReactJS- 12th HandsOn

[GuestPage.js](#)

```
import React from 'react';

const GuestPage = () => {
  return (
    <div>
      <h2>Welcome Guest</h2>
      <p>You can browse available flights below:</p>
      <ul style={{ listStylePosition: 'inside', paddingLeft: '0' }}>
        <li>Flight A - Delhi to Mumbai</li>
        <li>Flight B - Hyderabad to Bangalore</li>
        <li>Flight C - Chennai to Kolkata</li>
      </ul>
    </div>
  );
};

export default GuestPage;
```

[UserPage.js](#)

```
import React from 'react';

const UserPage = () => {
  return (
    <div>
      <h2>Welcome User</h2>
      <p>You are now logged in. Book your tickets below:</p>
      <ul style={{ listStylePosition: 'inside', paddingLeft: '0' }}>
        <li>Flight A - ₹4500 <button>Book</button></li>
        <li>Flight B - ₹3800 <button>Book</button></li>
        <li>Flight C - ₹5200 <button>Book</button></li>
      </ul>
    </div>
  );
};

export default UserPage;
```

App.js

```
import React, { useState } from 'react';
import './App.css';
import GuestPage from './components/GuestPage';
import UserPage from './components/UserPage';

function App() {
  const [isLoggedIn, setIsLoggedIn] = useState(false);

  const handleLogin = () => {
    setIsLoggedIn(true);
  }

  const handleLogout = () => {
    setIsLoggedIn(false);
  }

  let content;
  if (isLoggedIn) {
    content = <UserPage />;
  } else {
    content = <GuestPage />;
  }

  return (
    <div className="App">
      <h1>Ticket Booking App</h1>
      {isLoggedIn? (
        <button onClick={handleLogout}>Logout</button>
      ) : (
        <button onClick={handleLogin}>Login</button>
      )}

      <hr />
      {content}
    </div>
  );
}

export default App;
```

OUTPUT

localhost:3000

Ticket Booking App
